

## Rapid Scout HQ - The Ultimate Mobile Surveillance Solution

Intelligent Security Integration has 15 years' direct experience designing and installing state of the art, multi-faceted electronic security solutions across all business sectors throughout Australia. We designed and built the first Rapid Scout HQ as a hire service for event management companies however, its unique design features and our ability to customise the vehicle for use in literally any situation, has led to demand from Government agencies, emergency service providers and private security organisations around the Asia Pacific region to build units specifically for their needs.

**Our standard Rapid Scout HQ has the following Imaging and Communications features:**

-  HD Fixed, thermal, PTZ (pan, tilt & zoom) and 360 degree 4K cameras
-  8 x Vehicle roof -mounted HD cameras for 360-degree visibility with either stationary or mobile recording capabilities
-  5 x Autonomous rapid deploy camera kits, specific for 15km range remote surveillance operations, streaming live footage to the vehicle over a private, secure network All kits have GPS tracking, integrated battery power, private Point-to-Multipoint (PTMP) wireless network link plus cloud connectivity over 3G/4G LTE networks, with up to 2 weeks' remote operational capability.
-  Telescopic mast to 12.5m above vehicle equipped as standard with 2 x 180 degree fixed HD cameras and 1 x long range IR PTZ camera ideal for perimeter protection
-  IP two-way PA systems
-  On-board UHF2 way radio system
-  5 Outdoor PoE networked horn speakers provide clear, long range speech for remote speaking in video surveillance applications

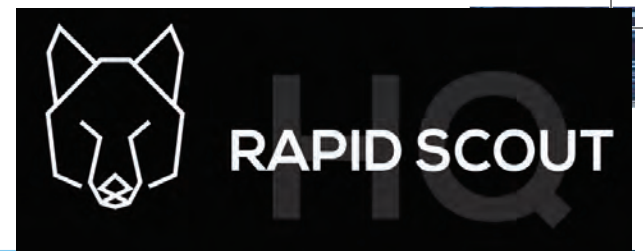

📍 6 Westside Avenue,
