

Intelligent Security Integration is a manufacturer of customised physical security products that enable Government, law enforcement, emergency management agencies and Defence to respond to threats to public security in real time.

Rapid Scout was created to meet the heightened concern for public safety

The Rapid Scout

- A network of rapidly-deployable mobile cameras, set up in minutes
- Military-grade encrypted multi-channel connectivity
- Live, real-time video streaming back to command centre
- Built-in two-way audio communication
- Unlimited Cloud image and audio data recording
- extra-long battery life
- Robust, light, secure camera module enclosures and fittings.
- Stored data can be integrated with topographical, traffic movement, meteorological and other data to build a virtual 3-D incident record for in-depth analysis.
- Choice of camera capabilities including thermal, PTZ (pan, tilt zoom), Infra-red & 4K from Axis Communications

RAPID SCOUT®

Multiple Functions to Expand Your Surveillance Footprint

- Each autonomous camera host unit can support up to 3 satellite devices (cameras, PoE speakers) running on a single battery for up to 7 days.
- Units can be deployed in minutes and create a site perimeter with no need for cable Infrastructure or mains power

Multiple Connectivity Options

- Cloud-based monitoring - options for closed, 4G or connectivity linked to other software, ability to view/hear output from cameras located anywhere in the world on a single tablet, computer or smartphone

VCA: Video Content Analytics

- Multi- Person Tracking Technology
- License Plate Recognition
- Abandoned Object Detection
- Zone Intrusion Detection
